

AMENDMENT TO SPECIFICATION

I. Please replace paragraphs [0002] and [0003] with.

[0002] Use of proper tool according to need is an essential element ~~essentialelement~~ for medical examination and treatment. Accordingly, many equipments are installed at a dental clinic to operate on one mount.

[0003] A dental clinic equipment should mainly ~~mainly~~ supply air or ~~air or~~ water to an end of one tool, and should remove saliva or water from a mouth ~~by mouth~~ by using a tool such as a suction.

II. Please replace paragraph [0019] with:

[0019] The machine part 100 includes an upper plate 104 covering an upper portion of a rectangular housing, which is opened at the upper portion and a lower portion; a rectangular machine chamber 103 having an opened upper portion and disposed at a predetermined removed portion of the upper ~~the upper~~ plate 104; and an operation panel 105 having a predetermined slanting surface and installed at the upper portion of the machine chamber 103. The slanting surface of the operation panel 105 has a plurality of operation buttons 106.

III. Please replace paragraph [0025] with:

[0025] The leg part 300 coupled to both inner side surfaces of the machine part 100 is connected and fixed to both inner side surfaces of the box part 200. The box part 200 has a rectangular shape having ~~having~~ an opened upper portion. When the leg part 300 is spread to couple with the machine part 100, the leg part 300 provides a space for housing the supply line 122, the operation ~~the operation~~ pedal 102 and the like.

IV. Please replace paragraph [0034] with:

[0034] After that, if a hose is connected to supply water and a small compress ~~compress~~ pump is connected to supply a compressed air to the dental care stand, the dental care stand is completely prepared.
